

3 WAYS

WE HELP YOU GET YOUR GRANT PROPOSAL DONE

Grant funding only comes around every once in a while and typically when you have the absolute least bandwidth for a side project. Clean Energy Delivery has developed over \$90M in funded proposals. We will work with you to get your proposal submitted on time and with your best chance for scoring a big win. Simultaneously ease your stress level while increasing your odds of success by bringing us onboard today!

We typically work with our clients in one of three different types of engagement.

1

2

3

PRE-SCORING

Have you ever had a standardized test that you prepared for: SAT, GRE, or ACT? Or how about a critical public performance or document you needed to submit for review? Did you just wing it? No, you took pre-tests or had others give you a critique before the real deal. The best grant proposals rely on the same method. Let us pre-score your proposal *before* the review committee lays eyes on it. Eliminate your mistakes before they matter... and win.

SOUP-2-NUTS

When it absolutely, positively has to get done and you absolutely, positively do not have the ability to do it yourself, you can hand off the entire grant proposal to us. We will make sure that it's done in a manner that exceeds your high standards and is looked upon favorably by the review committee. We are the experts you have been looking for!

HELPING HAND

Handoff to us the grant-writing task you least like taking care of: securing letters of support, assembling your budget or scope of work, final editing of the compiled documents, or any number of dreaded activities. Delegate one or more of these discrete tasks to us and confidently know that it will get done better than maybe you could have even done it yourself!
